

Development and implementation of digitalisation solutions

Your challenge

You want to drive the digitization in your company and realize a paperless, more efficient office? However, you are unsure whether and what improvement potential you can realize in the processes? You would like to see what an individual digitalisation solution for your application looks like and what scope of services must be covered by the system? You lack the time for a systematic analysis of your processes and the development of an appropriate digitalisation solution? Then we would be happy to support you in the development and introduction of a digitalisation solution.

Our services

- Systematic analysis of your current processes and common definition of the target state
- Structured recording and documenting of your requirements in the form of specifications according to VDI/VDE 3694
- Comprehensive research of digitalisation solutions (e.g. RFID, AR technology, internet of things)
- Combination of technologies for digitalisation scenarios tailored to the requirements
- Methodical evaluation of digitalisation scenarios regarding your technical and business requirements
- Coordination, implementation and evaluation of vendor presentations
- Support in the introduction of digitalisation solutions through professional project management and project controlling

Our commitment to quality

- Systematic approach coordinated with your input
- Structured documentation of requirements and digitalisation scenarios
- Methodical and transparent assessment and selection steps
- Professional project management as well as methods and facilitation skills

Your benefits

- Gaining knowledge about potential improvements through systematic analysis of your processes
- Digitalisation solution tailored to your specific applications
- Generating an understandable decision-making basis for the introduction of a digitalisation solution
- Inclusion of new digitalisation technologies and the current state of research and technology
- No committing of internal resources
